🚀 Professional Summary

Detail-oriented and resourceful **Full-Stack Web Developer** specializing in building scalable web applications. Proficient in the **.NET ecosystem (C#, ASP.NET Core)** for robust backend development, alongside **React** for dynamic, responsive frontends and rapid application delivery. Experienced in managing relational databases (SQL Server) and implementing secure architectures (JWT, N-Tier). Proven ability to deliver production-ready projects, from interactive client-side applications to complex management systems.

👛 Key Projects

Medical Clinic Management System

Full-Stack Developer | ASP.NET Core & React

- Designed and implemented a secure technical infrastructure for a clinic management system, featuring dedicated dashboards for doctors and patients.
- Built a robust backend API using ASP.NET Core, managing state and data flow seamlessly on the frontend using React.
- Integrated secure user authentication and role-based dashboard rendering.

Interactive "Smart Todo" Application

Frontend Developer | React & Vite

- Developed a dynamic task management application utilizing React and Vite for optimized build performance.
- Implemented persistent data storage using browser **Local Storage** to ensure a seamless, stateful user experience across sessions.

Professional Voting System

Database & Backend Developer | SQL Server & .NET

- Designed a structured relational database with optimized tables to manage user demographics and dynamic voting options.
- Ensured data integrity and prevented duplicate voting through backend validation logic.

🎓 Education

South Valley University – Qena, Egypt

Faculty of Arts | Department of Libraries and Information Technology

2028

- Leveraging strong foundational skills in data organization, information retrieval systems, and digital archiving to complement technical software engineering practices.

Technical Skills

- **Backend Development:** C#, ASP.NET Core, Web API
- **Frontend Development:** React.js, Vite, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
- **Database Management:** SQL Server, Entity Framework Core (EF Core), MySQL
- **Architecture & Security:** N-Tier Architecture, Repository Pattern, JWT Authentication, Local Storage State Management
- **Tools & Version Control:** Git, GitHub, Postman, VS Code, Visual Studio

Freelance & Digital Services

- Available for full-stack web development, RESTful API integration, and single-page application (SPA) architecture.
- Proficient in managing international freelance contracts, project scopes, and milestones across digital platforms (**Upwork, Mostaqi, Khamsat**).
